

## CUMULATIVE SAMPLE REPORT

Different laboratories generate reports that can vary greatly in appearance and in the order and kind of information included. This is one example of what a lab report may look like. Names and places used have been made up for illustrative purposes only. This report is an example of a cumulative report, which is a report that includes results of several different tests run on different days. The numbered key to the right explains a few of the report elements.

<b>1</b>	<b>University Medical Center, Dept. of Pathology</b>				<b>Report Date/Time:</b>	
	123 University Way, City, ST 12345				02/14/2014	16:13 <b>2</b>
<b>3</b>	<b>Name:</b>	Doe, John Q.	<b>Age/Sex:</b>	73/M	<b>DOB:</b>	01/01/1941
<b>4</b>	<b>Patient ID:</b>	987654321	<b>Status:</b>	Routine <b>7</b>		
<b>5</b>	<b>Ordering Dr:</b>	Smith, Peter MD	<b>Physician Copy for:</b>		Smith, Jane MD	
<b>6</b>	<b>Patient Medications:</b> multivitamins					

<b>8</b>	<b>SPEC #:</b>	223456	<b>Collection Date/Time:</b>	02/10/14	14:30 <b>11</b>	
			<b>Received Date/Time:</b>	02/10/14	15:00	
			<b>Reported Date/Time:</b>	02/10/14	16:40 <b>12</b>	
<b>9</b>	<b>SPECIMEN:</b>	Serum				
<b>10</b>	<b>ORDERED:</b>	Basic Metabolic Panel (BMP)				
	<b>COMMENTS:</b>	Specimen is non-fasting: slight hemolysis				
		<b>14</b>	<b>15</b>	<b>16</b>	<b>17</b>	<b>18</b>

Test	Normal	Abnormal	Flag	Units	Reference Range
<b>BASIC METABOLIC PANEL (BMP)</b>					
Sodium (Na)		124	L	mEq/L	136-145
Potassium (K)		5.8	H	mEq/L	3.5-5.1
Carbon Dioxide (CO2)	25			mEq/L	23-29
Chloride (Cl)	101			mEq/L	98-107
Glucose		107	H	mg/dL	74-100
Calcium (Ca)	10.1			mg/dL	8.6-10.2
Blood Urea Nitrogen (BUN)	17			mg/dL	8-23
Creatinine	0.9			mg/dL	0.8-1.3
Flag Key: L= Abnormal Low, H= Abnormal High, *= critical value					

<b>SPEC #:</b>	223457	<b>Collection Date/Time:</b>	02/10/14	14:30	
		<b>Received Date/Time:</b>	02/10/14	15:00	
		<b>Reported Date/Time:</b>	02/10/14	15:30	
<b>SPECIMEN:</b>	Whole Blood				
<b>ORDERED:</b>	Hemoglobin and Hematocrit, A1c				
Test	Normal	Abnormal	Flag	Units	Reference Range
Hemoglobin (HB/Hgb)		7.0	L**	gm/dL	14.0-18.0
Hematocrit (HCT)		21.1	L**	%	42.0-52.0
Hemoglobin A1c (A1c)	4.8			%	4.3-6.1
Flag Key: L= Abnormal Low, H= Abnormal High, **= critical value					
<b>19</b>	<b>Comment:</b> **Critical results Hgb of 7.0 and Hct of 21.1 reported to Dr. J Smith at 15:15 on 2/10/14 by M. Peters

<b>SPEC #:</b>	223459	<b>Collection Date/Time:</b>	02/10/14	14:30	
		<b>Received Date/Time:</b>	02/10/14	15:00	
		<b>Reported Date/Time:</b>	02/12/14	14:40	
<b>SPECIMEN:</b>	Plasma				
<b>ORDERED:</b>	Human Immunodeficiency Virus RNA, Quantitative (HIV-1 RNA Quant)				
Test	Normal	Abnormal	Flag	Units	Reference Range
HIV-1 RNA Quant	Less than 75			Copies/mL	Less than 75
Flag Key: L= Abnormal Low, H= Abnormal High, *= critical value					
<b>20</b>	<b>Comment:</b> Test performed by PDQ Reference Laboratory, 2222 University Way, City, ST 12345				

<b>SPEC #:</b>	223460	<b>Collection Date/Time:</b>	02/10/14	14:30	
		<b>Received Date/Time:</b>	02/10/14	15:00	
		<b>Reported Date/Time:</b>	02/11/14	11:40	
<b>SPECIMEN:</b>	Serum				
<b>ORDERED:</b>	Vitamin B12, Folate				
Test	Normal	Abnormal	Flag	Units	Reference Range
Vitamin B12 (B12)	250			pg/mL	210-1100
Folate		3.2	L	ng/mL	See Evaluation
Flag Key: L= Abnormal Low, H= Abnormal High, *= critical value					
<b>21</b>	<b>Comment:</b> Evaluation: >5.4 ng/mL = Normal Evaluation: 3.4-5.4 ng/mL = Borderline Evaluation: <3.4 ng/mL = Low				

<b>SPEC #:</b>	223725	<b>Collection Date/Time:</b>	02/11/14	12:30
		<b>Received Date/Time:</b>	02/11/14	13:00
		<b>Reported Date/Time:</b>	02/12/14	16:20
<b>SPECIMEN:</b>	Swab, Throat			
<b>ORDERED:</b>	Throat Culture for Beta Hemolytic Streptococci (Strep Throat Test)			
Test	Results	Reference Range		
Throat Culture for Beta Hemolytic Streptococci	Positive for group A streptococcus	Negative for group A streptococcus		
** END OF REPORT **				
Doe, John Q.	Patient ID: 987654321	02/14/2014	16:13	

- Name and address of the lab where the test was performed. Tests may be run in a physician office lab, a lab located in a clinic or hospital, and/or samples may be sent to a reference laboratory for analysis.
- Date this copy of the report was printed. This date may be different than the date the results were generated, especially on cumulative reports (those that include results of several different tests run on different days).
- Patient name or identifier. Links results to the correct person.
- Patient identifier and identification number. Links results to the correct person.
- Name of doctor. The lab will send the results to the doctor(s) or other health practitioners listed.
- Listing of medications the patient is currently taking. Some tests results are affected by medications, vitamins and other health supplements, so laboratories may obtain this information from the test request form and transcribe it onto the lab report.
- Status of the test request, such as Routine or STAT (perform test as rapidly as possible).
- Unique identification number(s). Number(s) assigned to the sample(s) when it arrives at the laboratory.
- Specimen source. Some tests can be performed on more than one type of sample (such as blood, serum, plasma, cerebrospinal fluid, etc.).
- Information about the patient or the sample. Any pertinent information regarding the patient's test preparation or the condition of specimen may be noted here.
- The date and time of sample collection and the date and time that the sample was received into the laboratory
- Test report date. This is the date the tests results were generated and reported for this particular sample.
- A listing of the tests performed on the sample. Test names may be abbreviated on lab reports. You can look for these test names in the pull-down menu on the home page of this site or type the name into the search box to find information on specific tests.
- A listing of the results that are normal.
- A listing of the results that are abnormal.
- An 'H' in this column may mean that the result is higher than the reference range. 'L' may mean 'low.' Either represents a result outside the reference range/value.
- Units of measurement (for quantitative results). The units of measurement that labs use to report your results can vary from lab to lab. Regardless of the units that the lab uses, your results will be interpreted in relation to the reference ranges supplied by the laboratory.
- Reference intervals (or reference ranges). These are the ranges in which "normal" values are expected to fall. The ranges that appear on your report are established and supplied by the laboratory that performed your test.
- Critical results are dangerously abnormal results that must be reported immediately to the responsible person, such as the ordering physician. The laboratory will often draw attention to such results with an asterisk (\*) or something similar and will usually note on the report the date and time the responsible person was notified.
- If a sample was sent to a reference laboratory for testing, the name and address of the lab will often be inserted next to the results or otherwise noted on the report.
- Interpretation of results. In certain circumstances, the lab may note on the report what certain test results may indicate.
